

Confirm permission

Record existing permission where it applies. Ask only for authority still missing.

Case name / date

Who approved / when / approval reference

Exact target and action covered

Content, version or commit set covered

Conditions, exclusions and permitted recovery

Fresh check: target and content still match?

What would make approval stale / decision now

Check: Proceed only while the action remains inside valid approval. Changed scope returns for review.

William Paul Herald · Keep the decision yours.
